Discussions:

1. As Manik promised, he gave us an example presentation, and asked us to pretend as to CEOs.
2. Manik asked us about what we have done for the previous week, and we told him we determined the database design, developed the database, modified the exhibitions' sizes. Currently, we are still developing the database, API, and exhibition search function.
3. We showed the draft of our second audit presentation draft, and asked for several suggestions about next week's' presentation:
 - a. Follow the feedbacks of last presentation.
 - b. Consider the content setting of the presentation.
 - c. Keep on practice.
